

Adrian Maliszewski

DevOps & Platform Engineering | Full-Stack Development | Cloud Solutions Architect

📍 Brampton, ON

✉ adrian@aftre.net

Technology Leader with 20+ years of experience spanning Cloud Solutions Architecture, Unix/Linux systems administration, full-stack web development, network engineering, and enterprise print infrastructure. Proactive, methodical problem-solver dedicated to building robust systems and driving automation. Proven track record of leading cross-functional teams, bridging technical gaps, and securing stakeholder trust to deliver high-impact enterprise solutions.

Core Competencies

- Cloud Architecture (AWS)
- DevOps / CI-CD Pipelines
- Infrastructure Automation
- Cross-Functional Team Leadership
- Stakeholder & Customer Management
- Technical Pre-Sales Support
- Escalation & Incident Management
- SOW & Contract Support
- P&L & Budget Accountability

Technical Toolbox

Cloud & Infrastructure: AWS (ECS, EC2, S3, RDS, Lambda, Route53, IAM, Secrets Manager, CloudWatch), Docker, Alpine Linux, Proxmox, QEMU, VMware, Hyper-V, Oracle Virtualbox

Frameworks: Laravel (PHP), HTML/CSS, REST APIs, OpenAI/AI Integrations, Wordpress CMS, JQuery, VueJS

Languages: PHP, Python, JavaScript, Bash, PowerShell, VBA, SQL, XML, YAML, JSON, Perl, C/C++

Operating Systems: Windows 10/11, Server 2008 R2, MacOS, Linux (Debian, Alpine), FreeBSD, OpenBSD

Networking & Security: TCP/IP, SNMP, OSPF, VPN (OpenVPN, AWS), SSH, SFTP, FTP, HTTP(S), DHCP, NetBIOS, SMB, NFS, Kerberos, Firewalls (PF, IPF, IPTables, Cisco IOS), NGINX, Apache, Wireshark, tcpdump, nmap, Let's Encrypt, Bind, ISC-DHCP

Databases: MySQL, MariaDB, PostgreSQL, Elasticsearch / OpenSearch, LDAP

ITSM & Productivity: ServiceNow, Remedy, PRTG, Github CI/CD, Wiz.io, Microsoft Office Suite, Icecast

Professional Experience

Xerox Canada

February 2004 – July 2026

Full Stack Developer & Unix Administrator Client: Bell Canada Montreal, QC (remote) November 2020 – July 2026

Led the end-to-end development lifecycle of cloud-based web applications and infrastructure administration for a major telecommunications client, collaborating with stakeholders and driving technical recruitment to support business growth.

- **Planned and executed** a comprehensive infrastructure migration to AWS, consolidating core applications to streamline cloud architecture and reduce the technology support footprint.
- **Architected and delivered** multiple production web applications end-to-end, leveraging containerization and modern frameworks to support large-scale enterprise operations.
- **Designed and implemented** GitHub CI/CD release management pipelines integrated with AWS ECS, optimizing deployment workflows and establishing structured issue-tracking processes.
- **Interviewed Candidates and Rebuilt** development team after turnover.
- **Automated critical workflows**, including secure PGP-encrypted database backups and OpenAI-driven document classification, to eliminate manual overhead and maximize operational efficiency.
- **Managed continuous security audits**, vulnerability remediations via Wiz.io, and infrastructure incident responses to safeguard network services and enterprise web applications.
- **Collaborated with stakeholders** to align technical deliverables with business goals, supporting sales cycles, SOW creation.

Technical Skills Summary

- **Backend Development:** Laravel (PHP), Python, RESTful APIs, Bash Scripting, MySQL, PostgreSQL
- **Frontend Development:** JavaScript, HTML5, CSS3, VueJS, XML/XSLX Generation
- **Cloud & DevOps:** AWS (ECS, EC2, Lambda, S3, RDS, Route53, IAM, CloudWatch), Docker, GitHub CI/CD

- **Security & Monitoring:** Wiz.io CVE Remediation, OpenSearch, ElasticSearch, Logstash, PGP Encryption, VPN
- **Enterprise Tools:** OpenText Exstream, SendGrid API, GitHub Tickets

Operations Manager & Fleet Analyst Client: Walmart Mississauga, ON January 2013 – July 2021

Managed account P&L, business development strategies, and built an on-site helpdesk team supporting a fleet of over 3,000 devices across 400+ nationwide locations.

- **Oversaw deployment projects** for hundreds of network multifunction devices across more than 400 nationwide locations, ensuring successful account operations.
- **Developed a proactive audit process** using PHP, Bash, and cURL to scrape website data for reports, which was deployed as a company-wide best practice.
- **Streamlined service call tracking** and proactive consumable delivery processes by developing custom macros and tools using VBA.
- **Conducted deep-dive packet captures** using Wireshark and tcpdump to analyze print data, managing engineering escalations to develop customized firmware.
- **Monitored device status** and deployed fleet-wide configuration changes utilizing PowerShell, SNMP, and interactive PDFs.
- **Integrated device configurations** within customer environments to support scan-to-network, secure print workflows, and network security scanning requirements.
- **Coordinated contractual deliverables** with nationwide service partners and technical services while directly managing helpdesk escalations from inception to resolution.
- **Built shared collaboration infrastructure**, including email, storage, and phone services, to enable seamless internal processes and team communication.
- **Managed account P&L** and executed short- and long-term business development strategies to achieve operating targets and identify customer opportunities.

Technical Skills Summary

- **Software Development & Scripting:** PHP, Bash, VBA, JavaScript, PowerShell, cURL
- **Systems & Network Administration:** Windows Print Servers, Equitrac, SNMP, Secure Print, Scan-to-Network
- **Security & Diagnostics:** Wireshark, tcpdump, Packet Capture, Network Security Scanning
- **Operations & Leadership:** P&L Management, Technical Recruitment, Contract Coordination, Vendor Escalations

Print Analyst Client: Mackenzie Toronto, ON February 2004 – January 2013

- **Developed** a print-to-dept accounting chargeback system in Perl and a network file management Windows Service in C.
- **Built shared collaboration infrastructure**, including email, storage, and phone services, to enable seamless internal processes and team communication.
- **Managed account P&L** and executed short- and long-term business development strategies to achieve operating targets and identify customer opportunities.

Education & Certifications

CCNA Routing and Switching Certification 200-125 Cisco ID: CSC013138782 November 2019

Computer Networks Engineering Technician RCC College of Technology March 2003

- Program is OACETT & CTAB accredited
- Completed Computer Networks Engineering Technician program with a 4.35 / 5.00 GPA.
- Completed a 2-year college diploma in 12 months, through an accelerated learning program.

CCNA Certification July 2000
