

Professional Summary

Over twenty years of experience spanning full-stack web development, Unix/Linux systems administration, network engineering, and enterprise print infrastructure. Known for proactive methodical problem-solving in-depth analysis, driven to build and automate, and a natural ability to lead cross-functional teams and earn stakeholder trust.

Core Competencies

Cloud & Infrastructure: AWS (ECS, EC2, S3, RDS, Lambda, Route53, IAM, Secrets Manager), Docker, Alpine Linux

Operating Systems: Windows 11, Windows 10, Server 2008 R2, MacOS, FreeBSD, OpenBSD, Linux (Debian, Alpine, Kali, Redhat), Plan9, TempleOS

Frameworks: Laravel, VueJS, HTML/CSS, REST APIs, OpenAI/AI Integrations, Wordpress CMS

Networking: TCP/IP, SNMP, OSPF, VPN (OpenVPN, AWS), SSH, SFTP, FTP, HTTP(S), DHCP, NetBIOS, SMB, NFS, Kerberos, Firewalls (PF, IPF, IPTables, Cisco IOS), Wireshark, tcpdump, nmap, Let's Encrypt, Bind, ISC-DHCP, NGINX, Apache

Languages: PHP, Python, JavaScript, Bash, C/C++, Perl, PowerShell, VBA, SQL, XML, YAML, JSON, Powershell

Databases: MySQL, MariaDB, PostgreSQL, Elasticsearch / OpenSearch, LDAP

Other: ServiceNow, Remedy, PRTG, Proxmox, QEMU, VMware, Hyper-V, Oracle Virtualbox, Microsoft Office Suite, Icecast

Team leadership & mentoring: Customer & stakeholder management, Engineering escalation management, SOW & contract support, P&L accountability, Process documentation, Sales cycle support

Work Experience

<i>November 2020 – Present</i>	Full Stack Developer & Unix Administrator Xerox Canada @ Bell Canada	(Remote) Montreal, QC
--------------------------------	--	------------------------------

Key Accomplishments

- Architected and delivered multiple production web applications end-to-end using Docker, Alpine Linux, Laravel (PHP), JavaScript, HTML, and CSS, supporting Bell Canada's operations.
- Planned, oversaw and executed projects to consolidate applications and infrastructure to migrate to a single cloud provider: AWS; IAM, Secrets Manager, Route53, RDS, ECS, EC2, S3, Lambda, Cloudwatch, OpenSearch, VPN.
- Streamlined and reduced technology support footprint standardizing many platforms under Docker in AWS.
- Supported OpenSuse deployment of OpenText Exstream print data processing Bash shell script integration.
- Deployed ElasticSearch / OpenSearch databases with Logstash integrated synchronization.
- Supported networks service, server, and web applications security audits and provided incident response.
- Reviewed and remediated CVE (common vulnerability exposures) using Wiz.io.
- Implemented Github CI/CD release management pipeline deployment integration to AWS ECS.
- Implemented issue tracking from inception to resolution leveraging Github support tickets.
- Documented projects and processes. Supported sales cycles, contract drafts, customer meetings and SOW delivery.
- Implemented reports in Microsoft Excel spreadsheet including charting using Laravel.
- Mailing campaigns using Python and Sendgrid API.
- Automated backup of SQL databases to remote NAS over SSH with data encryption at rest using PGP.
- Updated and created MySQL database schemas and stored procedures.
- Supported VueJS Single Page Applications backed by JSON RESTful APIs.
- Integrated OpenAI ChatGPT API into Laravel-based data management workflows, automated document classification.

Responsibilities

- Provide full-stack development, infrastructure administration, and technical support across a remote-first engagement with a major Canadian telecommunications client.
- Own the design, development, testing, deployment, and monitoring of web applications and integrations.
- Identify and mitigate security vulnerabilities; respond to incidents and escalate as appropriate.
- Collaborate with stakeholders to gather requirements, define deliverables, and ensure alignment with business objectives.

*January 2013 – July 2021*Operations Manager & Fleet Analyst
Xerox Canada @ Walmart Canada

Mississauga, ON

Key Accomplishments

- Oversaw projects deploying 100s of network multifunction devices across over 400 nationwide locations.
- Developed a proactive consumable audit process generating reports from scraped website data which was later deployed as company-wide best practice. Implemented using PHP, BASH, and curl.
- Developed streamlined service call tracking and proactive consumable delivery processes using VBA.
- Conducted deep dive packet captures using Wireshark and tcpdump. Analyzed postscript print data, submitted and managed engineering escalations to develop customized firmware compatible with the customer's environment.
- Developed interactive PDFs using JavaScript.
- Used Powershell and SNMP to monitor device status and deploy configuration changes.
- Integrated device configuration with customer environment to support scan to network and secure print workflows.
- Facilitated device network security scanning, liaised with Xerox security to ensure adherence to network requirements.

Responsibilities

- Managed onsite helpdesk team supporting a fleet of over 3000 devices in diverse environments.
- Provide mentorship, leadership and motivation.
- Managed key contact and direct report escalations from inception to resolution.
- Administered Equitrac servers, Microsoft Windows print servers, queue and driver settings.
- Integrated helpdesk call flow between customer, service partner and Xerox.
- Co-ordination of contractual deliverables with service partners and technical services across Canada.
- Provide on-site services delivering a high level of customer service satisfaction, and the successful account operation.
- Internal process creation and management required to enable operational excellence and seamless service delivery.
- Supported long and short-term account and business development strategies identifying risk, opportunity and understanding of customer requirements.
- Built shared email, storage and phone service infrastructure to enable and promote team collaboration.
- Built and maintained client relationships across all stakeholders.
- Responsible for account P&L management, execution of strategy to achieve operating targets.

February 2004 – January 2013

Print Operations Support Analyst
Xerox Canada @ Mackenzie Financial

Toronto, ON

Key Accomplishments

- Developed a network file management Windows Service solution written in C.
- Developed a print-to-department accounting chargeback system written in Perl.
- Developed BASH shell scripted process using ImageMagick to convert PDF documents to JPEG thumbnails for web use.
- Involved with various development projects requiring data analysis and customer consultation.
- Conducted technical support tasks for software and network operation.

Responsibilities

- Site management duties, employee leadership and mentoring, key customer contact.
- Issue tracking, escalation and progress reporting using Remedy ticketing system.
- Operated Xerox 4890, 4635, DC260, Nuvera 100EA printing equipment, the Barr Enterprise Print Server and the IBM z/OS Mainframe SDSF system.
- Completed design and modification of forms, fonts using Elixir suite.
- Responsible for JSL programming of IBM Mainframe LCDS for use on Xerox Printers.
- Interdepartmental liaison, scheduling of tasks, completion of documentation.
- Trained staff on BARR Server operation, mainframe operation, and all operating procedures.
- Developed, implemented and documented disaster recovery and business continuity procedures, all operating procedures.

Education & Certifications

November 2019

CCNA Routing and Switching Certification – 200-125
Cisco ID: CSC013138782

- Achieved CCNA certification through self-study.
- Cisco Certified Network Associate (CCNA) validates the ability to install, configure, operate, and troubleshoot medium-size route and switched networks, including implementation and verification of connections to remote sites in a WAN. Able to install, configure, and operate LAN, WAN, and dial access services for small networks.
- Working knowledge of IP, IPv6, RIP, OSPF, EIGRP, BGP, VLANs, Ethernet, Access Lists.

March 2003

Computer Networks Engineering Technician
RCC College of Technology

Concord, ON

- Completed Computer Networks Engineering Technician program with a 4.35 / 5.00 GPA.
- Completed a 2-year college diploma in 12 months, through an accelerated learning program.
- Over 550 hours of practical and individualized lab completed.
- Program is OACETT & CTAB accredited.

July 2000

CCNA Certification

- Achieved CCNA certification through self-study.
